Project Overview

Project Introduction of BPO Profile

Domain: bpoprofile.com

BPO Profile is a centralized digital platform designed to connect **BPO companies, sales professionals, and potential clients** in one professional industry directory.

The platform allows BPO companies to create and showcase detailed company profiles while enabling their **sales executives and business development representatives** to maintain dedicated professional profiles with their role, expertise, services, location, and direct contact information.

Inspired by the discovery and connection experience of platforms like **Zocdoc**, BPO Profile will make it easier for businesses to **discover the right outsourcing provider and connect directly with the appropriate sales representative**—without unnecessary barriers between buyers and BPO companies.

Beyond being a directory, BPO Profile is designed as a **BPO industry visibility and lead-generation platform**, helping companies improve their online presence, support off-page SEO, generate qualified business opportunities, and become more discoverable to potential clients worldwide.

Core Concept

BPO Company → Sales Professional → Potential Client

The goal is to create a trusted professional network for the global outsourcing industry where businesses can easily **discover, evaluate, and connect with BPO providers and the people responsible for developing those business relationships.**

Sitemap

Sitemap Overview

The **BPO Profile** sitemap is structured to create a simple, professional, and scalable platform for discovering BPO companies and connecting directly with their sales and business development professionals.

The website will be organized around three primary user journeys: **Discover a BPO, Explore Profiles, and Connect with the Right Sales Professional.** Users will be able to search and filter BPO companies by services, industries, locations, and capabilities, while dedicated company and sales professional profiles provide the information needed to evaluate and initiate contact.

The sitemap will also support **BPO companies and sales professionals** through registration, profile creation, profile management, and lead-generation features. Resources, industry pages, service pages, location pages, and other content sections will provide a strong foundation for **SEO, online visibility, and long-term industry authority**.

Key Sitemap Sections

- **Home** – Introduction to the platform and primary discovery actions.
- **Find BPO** – Main search and discovery experience for potential clients.
- **BPO Profiles** – Directory of BPO companies with detailed company information.
- **Sales Pros** – Directory of BPO sales executives and business development professionals.
- **Pricing** – Paid listing and profile packages for BPO companies and professionals.
- **Resources** – Blog, insights, guides, and industry-related content.
- **Contact Us** – Company information, support, and general inquiries.
- **Sign In / Register** – Account access and onboarding for companies and professionals.

Pricing Model

The **Pricing** section will follow a tiered premium listing model, with the overall concept inspired by **Storeboard's Premium Packages**.

Storeboard Premium Packages

The model can offer different levels of visibility and profile benefits, allowing BPO companies and sales professionals to choose packages based on their business needs. Higher-tier plans can provide increased visibility, enhanced profile features, priority placement, additional exposure, and other promotional benefits.

This approach gives BPO Profile a potential **freemium-to-premium monetization structure**, where basic participation can help build the directory while paid packages generate revenue from businesses seeking greater visibility and lead opportunities.

Overall Platform Flow

Discover → Search → Evaluate → Connect → Generate Business Opportunities

The sitemap is designed to keep **"Find a BPO"** as the primary discovery action while making **BPO Company Profiles and Sales Professional Profiles** the core assets of the platform.

Brand Book

BPO PROFILE

Brand Book & Digital Brand Guidelines

Brand: BPO Profile
Category: BPO Discovery & Professional Networking Platform
Purpose: Connect businesses with BPO companies and the sales professionals behind them.
Brand Foundation: Adapted from the All BPO Sites brand strategy.

---

1. Brand Overview

What Is BPO Profile?

BPO Profile is a professional discovery and networking platform built for the global Business Process Outsourcing industry.

It gives BPO companies a place to showcase their capabilities, services, industries, locations, and people while giving sales executives and business development professionals a dedicated professional presence.

For potential clients, BPO Profile makes it easier to:

Discover → Evaluate → Connect

Instead of simply finding a BPO company, users can also discover the people responsible for building business relationships and connect with them directly.

Core Concept

BPO Company → Sales Professional → Potential Client

BPO Profile turns a traditional company directory into a more human, professional, and actionable discovery experience.

---

2. Brand Foundation

BPO Profile inherits the strongest principles of the All BPO Sites brand:

- Visibility
- Discovery
- Trust
- Opportunity
- Growth
- Inclusion
- Transparency
- Simplicity
- Professional credibility

The parent brand identifies a market problem around fragmented BPO visibility and the difficulty of discovering trustworthy providers. BPO Profile narrows that opportunity into a focused experience centered on **companies and the professionals behind them**.

Brand Mission

Make it easier for businesses to discover the right BPO company and connect with the right person.

Brand Vision

To become the professional discovery and networking layer of the global BPO industry.

Brand Purpose

BPO Profile exists to make BPO discovery more accessible, transparent, and human by giving companies and their sales professionals greater visibility and creating direct pathways to business opportunities.

Brand Promise

Discover the company. Meet the people. Start the conversation.

BPO Profile should consistently provide:

- Relevant BPO companies
- Clear company information
- Discoverable sales professionals

- Direct paths to contact
- Useful industry information
- A trustworthy and professional experience

---

3. Brand Positioning

Positioning Statement

BPO Profile is the professional BPO discovery platform where businesses can find outsourcing providers, understand what they offer, and connect directly with the sales professionals who represent them.

What We Stand For

BPO Profile is not simply:

- A list of BPO websites
- A generic business directory
- A job board
- A social network
- A lead marketplace

It is a **BPO-focused professional discovery network**.

Key Differentiator

Most directories primarily organize companies.

BPO Profile organizes both the company and the people behind the company.

This creates two connected discovery layers:

Company Discovery

Find the right BPO provider.

People Discovery

Find the right sales executive or business development professional.

That relationship should be one of the defining characteristics of the brand.

---

4. Brand Pillars

01 — DISCOVERY

Help businesses quickly find relevant BPO providers and professionals.

Message:
Find the right BPO without searching the entire internet.

---

02 — VISIBILITY

Give BPO companies and sales professionals a stronger professional presence online.

Message:
Be easier to find, understand, and remember.

---

03 — CONNECTION

Reduce unnecessary barriers between potential clients and BPO representatives.

Message:
Go beyond the company profile and connect with the person behind it.

---

04 — TRUST

Make information clear, professional, transparent, and increasingly verified.

Message:
Know who you're contacting and what they offer.

---

05 — OPPORTUNITY

Create pathways for companies, sales professionals, and buyers to discover mutually valuable opportunities.

Message:
Every profile can become a business conversation.

---

5. Brand Personality

BPO Profile should inherit the personality established in the All BPO Sites brand guide while placing slightly greater emphasis on **professional networking and human connection**. The parent brand defines the personality as welcoming, helpful, confident but humble, forward-thinking, slightly playful, and trustworthy.

Welcoming

The platform should feel open to companies of different sizes, locations, and specialties.

Helpful

Users should always understand what to do next.

Confident

BPO Profile should communicate authority without sounding corporate or intimidating.

Human

People should feel like the center of the platform—not just company records.

Forward-Thinking

The brand should feel modern, digital-first, and built for the future of outsourcing.

Trustworthy

Profiles, information, communication, and platform behavior should reinforce credibility.

Slightly Playful

Small moments of personality are welcome, but professionalism always comes first.

---

6. Brand Character

If BPO Profile were a person, it would be:

The knowledgeable industry connector.

It knows the BPO industry, understands what buyers need, knows that relationships matter, and helps people find the right connection without making the process complicated.

We Are

- Professional
- Modern
- Approachable
- Helpful
- Clear
- Connected
- Credible
- Practical
- Optimistic

We Are Not

- Corporate and stiff
- Overly technical
- Aggressive
- Salesy
- Complicated
- Pretentious
- Buzzword-heavy
- Anonymous

---

7. Target Audiences

A. Potential Clients / Buyers

Who They Are

Businesses looking for BPO, outsourcing, CX, contact center, back-office, technology, or related outsourcing capabilities.

Their Needs

- Find qualified providers
- Compare capabilities
- Understand services
- Identify relevant locations
- Find the right contact
- Start a conversation quickly
- Reduce research time

What BPO Profile Should Communicate

“We'll help you find the right provider and the right person to talk to.”

B. BPO Companies

Their Needs

- Greater visibility
- Professional credibility
- Better online discovery
- Company representation
- Lead generation
- Search exposure
- Ability to showcase services
- Ability to showcase sales representatives

Core Message

“Put your BPO company and your team in front of the businesses looking for what you offer.”

C. Sales Executives & Business Development Professionals

Their Needs

- Professional visibility
- Personal branding
- Direct business opportunities
- Industry networking
- Search discoverability
- Ability to represent their company
- Direct contact opportunities

Core Message

“Build your professional presence and become easier for potential clients to find.”

---

8. User Experience Strategy

The primary experience should be built around three simple actions:

DISCOVER

Search for:

- BPO companies
- Services
- Industries
- Locations
- Sales professionals

EVALUATE

Review:

- Company profile
- Services
- Industries
- Locations
- Capabilities
- Company information
- Sales team
- Professional profiles

CONNECT

Take action:

- Contact a sales professional
- Send an inquiry
- Request information
- Request a quote
- Visit the company's website
- Save a profile for later

Core UX Principle

Every page should help the user take the next step.

This follows the parent brand's action-oriented approach: communication should encourage users to explore, connect, and move forward.

---

9. Brand Architecture

BPO Profile should have three primary profile layers.

Layer 1 — BPO Company

The organizational identity.

Includes:

- Company name
- Logo
- Overview
- Services
- Industries
- Locations
- Company size
- Capabilities
- Technology
- Website
- Social links
- Certifications
- Client proof/testimonials
- Sales team

Layer 2 — Sales Professional

The human identity.

Includes:

- Name
- Professional photo
- Job title
- Company
- Bio
- Expertise
- Services
- Industries
- Markets served
- Location/time zone
- Languages
- Contact options
- Company affiliation
- Professional links

Layer 3 — Opportunity

The connection layer.

Examples:

- Contact
- Request quote
- Request consultation
- Ask a question
- Schedule conversation
- Submit inquiry
- Explore services

The platform should progressively connect these three layers:

Company → Person → Opportunity

---

10. Website Navigation

Primary Navigation

Logo

- Find a BPO
- BPO Profiles
- Sales Pros
- Services
- Industries
- Locations
- Resources
- Pricing

Primary CTA: Get Listed

Secondary: Sign In

---

11. Recommended Website Structure

Home

Purpose: Explain the value proposition and immediately begin discovery.

Primary elements:

1. Hero search
2. Featured BPO companies
3. Popular services
4. Featured sales professionals
5. Browse by industry
6. Browse by location
7. Why BPO Profile
8. How it works
9. CTA for BPO companies
10. Resources / insights

Find a BPO

The primary discovery experience.

Search and filter by:

- Service
- Industry
- Location
- Country
- Company size
- Capabilities
- Work model
- Language
- Technology
- Other relevant BPO attributes

BPO Profiles

Directory of participating companies.

Recommended result card:

Logo → Company → Location → Key Services → Industries → Short Description → Verified Status → View Profile

---

Sales Pros

Professional directory of sales executives and business development representatives.

Recommended card:

Photo → Name → Position → Company → Expertise → Location → Connect

---

Services

SEO-friendly service categories such as:

- Customer Support
- Contact Center
- Back Office
- Technical Support
- Finance & Accounting
- Healthcare BPO
- IT Outsourcing
- Sales Outsourcing
- Data Services
- Specialized Outsourcing

Categories should expand as the marketplace develops.

Industries

Industry-specific discovery pages.

Examples:

- Healthcare
- E-commerce
- Financial Services
- Technology
- Real Estate
- Travel & Hospitality
- Telecommunications
- Retail

Locations

Geographic discovery.

Structure:

Global → Country → Region/City

This creates useful discovery and SEO pathways without making geography the only way to search.

Resources

Content hub for:

- BPO insights
- Outsourcing guides
- Industry trends
- Buyer guides
- BPO company stories
- Sales and business development insights
- Case studies

---

12. BPO Company Profile Design

The company profile should feel like a **mini professional website**, not a directory listing.

Recommended Hierarchy

Header

- Logo
- Company name
- Verification status
- Location
- Primary CTA

About

Short, clear company introduction.

Services

Visual service categories.

Industries

Industries served.

Capabilities

Important operational capabilities.

Locations

Where the company operates.

Why Choose Us

Differentiators and strengths.

Sales Team

Prominent section introducing sales professionals.

Contact

Direct inquiry/contact action.

Company Website

Clear external website link.

---

13. Sales Professional Profile

This is a major brand differentiator and should receive strong visual prominence.

Profile Header

- Professional photo
- Name
- Job title
- Company
- Location
- Verification
- Primary contact CTA

Profile Content

- About
- Expertise
- Services represented
- Industries
- Markets served
- Languages
- Experience
- Company information
- Contact options

Primary CTA

Connect with [Name]

Secondary options:

- Contact

- Request a Quote
- Visit Company
- Share Profile

The experience should feel professional rather than like a social media profile.

---

14. Search & Discovery Principles

Search should be one of the most important product experiences.

Homepage Search

Recommended prompt:

What kind of BPO partner are you looking for?

Supporting search options:

Service | Industry | Location

Primary CTA:

Find a BPO

Secondary discovery:

Find a Sales Pro

Search Results

Results should prioritize:

1. Relevance
2. Profile completeness
3. Verification
4. Location/service match
5. Quality
6. Premium visibility where commercially appropriate

Sponsored or premium placement should never make the experience feel deceptive.

---

15. Trust & Verification

Trust should become an important product layer.

Potential verification indicators:

- Verified Company
- Verified Sales Professional
- Claimed Profile
- Verified Website
- Profile Complete
- Featured Provider

Verification should always have clear meaning.

Avoid badges that exist purely for decoration.

---

16. Core Features

Launch Features

Directory

- BPO company listings
- Sales professional directory
- Categories
- Locations
- Search
- Filters
- Sorting

Company Profiles

- Editable profiles
- Services

- Industries
- Locations
- Team members
- Contact information

Sales Profiles

- Professional profile
- Company association
- Expertise
- Contact information
- Professional visibility

Lead Generation

- Contact form
- Inquiry routing
- Request quote
- Sales professional contact
- Company contact

Account Management

- Registration
- Sign in
- Company dashboard
- Sales professional dashboard
- Profile editing

Trust

- Claim profile
- Verification
- Profile completeness

---

17. Future Networking Features

As the platform develops, BPO Profile can evolve beyond discovery.

Potential additions:

- Direct messaging
- Meeting scheduling
- Saved profiles
- Favorites
- Compare BPOs
- Client requirements / RFQs
- Multi-provider inquiries
- Sales networking
- Recommendations
- Reviews
- Testimonials
- Lead management
- CRM integrations
- Analytics
- Premium lead tools

These should be introduced progressively rather than overloading the initial product.

---

18. Visual Identity

BPO Profile should retain the core All BPO Sites visual foundation while developing a more polished **professional-networking/directory interface**.

The parent brand specifies the primary colors as:

- **BPO Blue:** #2389C2
- **Slate:** #394454
- **Black:** #1E1E1E

Color should be used deliberately rather than excessively.

Recommended Digital Application

Primary Blue — #2389C2

Use for:

- Primary CTA
- Active states
- Links
- Key highlights
- Search actions
- Interactive elements

Slate — #394454

Use for:

- Navigation
- Secondary buttons
- Supporting UI
- Dark sections
- Professional accents

Black — #1E1E1E

Use for:

- Primary text
- Headings
- Strong contrast

Supporting Colors

The website may introduce a restrained neutral UI palette:

- White
- Very light gray
- Light borders
- Soft gray backgrounds
- Neutral card surfaces

Avoid turning the website into a highly colorful marketplace.

---

19. Typography

The All BPO Sites brand establishes:

Primary Typeface: Poppins
Secondary Typeface: Calibri

Poppins should continue to carry the brand's modern, friendly, impactful personality, while Calibri provides readable supporting content.

Recommended Hierarchy

Level	Size	Weight	Use
H1	48px	Bold	Hero / main page heading
H2	36px	Semi-Bold	Major sections
H3	28px	Semi-Bold	Cards / subsections
H4	22px	Medium	Secondary headings
H5	18px	Medium	Supporting headings
H6	14px	Regular	Labels / captions

These scales are inherited from the existing brand guide.

For implementation, all sizes should become responsive across desktop, tablet, and mobile.

---

20. UI Design Language

Because the original All BPO Sites guide leaves the detailed UI library as an area to be developed, BPO Profile should establish its own digital component system while preserving the parent brand's typography, color, accessibility, and personality principles.

Recommended Components

Buttons

- Primary
- Secondary
- Outline
- Text/link

Directory Cards

- Company card
- Sales professional card
- Featured card

Profile Elements

- Avatar
- Logo
- Verification badge
- Location
- Service tags
- Industry tags
- Contact CTA

Search

- Search bar
- Filter chips
- Dropdown filters
- Filter drawer
- Sort control

Content

- Section cards
- Article cards
- Testimonial cards
- Statistics blocks

Navigation

- Desktop header
- Mobile navigation
- Breadcrumbs
- Sidebar filters

Trust

- Verification badge
- Profile completeness

- Claimed profile indicator

---

21. Layout Principles

The website should feel:

Clean + Professional + Human + Searchable

Recommended characteristics:

- Generous whitespace
- Clear content hierarchy
- Strong search experience
- Card-based directory layouts
- Simple navigation
- Clear CTAs
- Consistent spacing
- Strong visual alignment
- Responsive design
- Minimal visual clutter

Avoid creating a website that looks like an old-style business directory packed with listings.

The goal is to make the directory feel like a **modern professional network**.

---

22. Photography & Imagery

The parent brand's visual direction emphasizes professionalism, approachability, collaboration, and growth, with people kept central to the imagery.

BPO Profile should therefore emphasize:

- Professional portraits
- Sales professionals
- BPO teams
- Business conversations
- Collaboration

- Technology
- Global teams
- Client relationships

Portrait Style

Prefer:

- Medium shots
- Waist-up portraits
- Eye contact
- Bright, soft lighting
- Clean backgrounds
- Consistent cropping

Stylized/vector portraits can be used where professional photography is unavailable, consistent with the existing brand direction.

---

23. Content Strategy

Content should make the platform useful even before users are ready to contact a BPO.

Content Pillars

BPO Discovery

Help buyers understand how to evaluate providers.

Outsourcing Education

Explain services, models, terminology, and considerations.

Industry Insights

Cover developments affecting BPOs and outsourcing buyers.

BPO Profiles

Tell company stories and highlight capabilities.

Sales & Business Development

Highlight the people building BPO relationships.

Success Stories

Demonstrate how companies and buyers connect.

---

24. Brand Voice

BPO Profile should directly inherit the parent brand's core voice:

Clear. Confident. Helpful. Human.

The original guide specifically emphasizes straightforward language, confident but non-arrogant communication, action-oriented messaging, inclusiveness, and conversational professionalism.

We Say

Find the right BPO.
Meet the people behind the service.
Explore BPO providers.
Connect with a sales professional.
Get your company discovered.
Build your professional profile.

We Avoid

- “Leverage synergistic outsourcing ecosystems”
- “Transform your business through disruptive solutions”
- “Best-in-class next-generation solutions”
- Unnecessary industry jargon
- Long corporate statements
- Aggressive sales language

Clarity should always win over cleverness.

---

25. Messaging Framework

Master Message

Find BPO companies. Meet the people behind them.

Supporting Message

BPO Profile makes it easier to discover outsourcing providers, explore their capabilities, and connect directly with sales professionals.

For Buyers

Find the right BPO for your business.

For BPO Companies

Put your company in front of businesses looking for outsourcing partners.

For Sales Professionals

Build your professional presence and become easier to discover.

---

26. Calls-to-Action

CTAs should be direct, simple, and action-oriented, consistent with the parent brand's writing guidance.

Primary

- Find a BPO
- Start Your Search
- Get Listed

- Create Your Profile
- Connect with a Sales Pro

Secondary

- View Profile
- Explore Services
- Meet the Team
- Contact Sales
- Request a Quote
- Claim This Profile
- Learn More

Avoid vague CTAs such as:

- Learn More
- Click Here
- Submit
- Discover Everything

when a more specific action is possible.

---

27. Homepage Brand Experience

The homepage should immediately answer three questions:

1. What is this?

A professional platform for discovering BPO companies and sales professionals.

2. Why should I care?

Find relevant outsourcing providers faster and connect with the right person directly.

3. What should I do?

Search for a BPO.

Recommended Hero

Headline:
Find the right BPO. Meet the right people.

Supporting copy:
Explore BPO companies, services, industries, locations, and sales professionals—all in one professional network.

Primary CTA:
Find a BPO

Secondary CTA:
Get Listed

---

28. SEO & Organic Growth

BPO Profile should be designed as an SEO-friendly information architecture from the beginning.

Indexable Assets

- BPO company profiles
- Sales professional profiles
- Service pages
- Industry pages
- Location pages
- Service + location pages
- Industry + service pages
- Resource articles
- Company stories
- BPO guides

SEO Principles

Each valuable page should have:

- Unique title
- Unique meta description
- Clear H1
- Structured content

- Internal links
- Descriptive URL
- Canonical URL
- Breadcrumbs
- Optimized images
- Appropriate structured data
- Strong page-level CTA

Avoid generating thousands of thin or duplicate pages simply for SEO.

---

29. Off-Page SEO Strategy

BPO Profile can naturally generate off-page visibility through:

- BPO company profile links
- Sales professional profile links
- Partner relationships
- Industry publications
- Guest articles
- BPO interviews
- Company announcements
- Industry reports
- Resource partnerships
- Social sharing
- Digital PR
- Featured BPO stories

The company profile itself should become a valuable digital asset that BPO companies want to claim, maintain, and share.

---

30. Lead Generation Strategy

Every major discovery page should have a logical conversion path.

Directory

View Profile

↓

Company Profile

Meet the Sales Team

↓

Sales Profile

Connect

↓

Lead

Inquiry / Quote / Conversation

The platform should track:

- Profile views
- Search impressions
- CTA clicks
- Contact requests
- Quote requests
- Website clicks
- Sales profile views
- Lead conversions

---

31. Monetization Direction

BPO Profile can use a freemium-to-premium directory model.

Basic

- Standard listing
- Company information

- Basic visibility

Professional

- Enhanced profile
- More profile content
- Sales team profiles
- Additional visibility
- Analytics

Premium

- Priority exposure
- Featured placement
- Promotional opportunities
- Enhanced lead-generation features
- Advanced analytics

Premium placement should enhance visibility without compromising search relevance or user trust.

---

32. Trust & Accessibility

Accessibility is part of the brand experience, not a separate technical requirement.

The parent guide calls for strong contrast, mobile consideration, avoiding color-only distinctions, accessible text, and appropriate media support.

BPO Profile should therefore support:

- Strong text/background contrast
- Keyboard navigation
- Visible focus states
- Accessible forms
- Descriptive labels
- Alt text
- Responsive layouts
- Readable typography
- Non-color-only status indicators

- Captions for video
- Clear error messages

---

33. Error & Empty States

The interface should remain human and helpful when something goes wrong.

No Results

No BPOs found. Try adjusting your search.

Failed Search

Something went wrong. Please try again.

Empty Profile

This profile is still being completed.

Contact Failure

We couldn't send your message. Please try again.

The parent brand specifically recommends neutral, clear, non-blaming system language.

---

34. Brand Do's & Don'ts

DO

- Keep language simple
- Make discovery easy
- Put people at the center
- Highlight trust and credibility
- Use clear CTAs
- Maintain strong visual hierarchy

- Use professional but approachable imagery
- Make profiles useful
- Make information easy to scan
- Encourage connection

DON'T

- Overcomplicate navigation
- Fill pages with excessive information
- Use corporate jargon
- Make the website feel like a generic directory
- Hide contact pathways
- Overuse brand colors
- Use distracting imagery
- Make premium listings feel deceptive
- Treat sales professionals as an afterthought
- Sacrifice usability for visual effects

---

35. Brand Experience Principles

Every BPO Profile experience should follow these five rules:

01 — MAKE IT EASY

Users should understand what to do without instruction.

02 — MAKE IT RELEVANT

Search and recommendations should prioritize useful results.

03 — MAKE IT HUMAN

Companies are represented by real people.

04 — MAKE IT TRUSTWORTHY

Information should be transparent and credible.

05 — MOVE PEOPLE FORWARD

Every page should create a natural next step.

---

36. Future Brand Evolution

As BPO Profile grows, the brand can expand from a directory into a broader professional ecosystem.

Potential future products:

BPO Marketplace

More structured buyer/provider discovery.

Professional Networking

Connections between BPO professionals.

BPO Reviews

Verified client feedback and testimonials.

Lead Marketplace

Qualified business opportunities.

BPO Intelligence

Industry data, trends, benchmarks, and insights.

Events & Community

Industry networking and virtual events.

Jobs & Talent

Connecting BPO companies with industry talent.

Matching

Intelligent matching between buyers and BPO providers.

Integrations

CRM, scheduling, messaging, analytics, and business systems.

The brand should therefore remain broad enough to support future expansion while maintaining a clear initial position around **BPO discovery and professional connection**.

---

37. Brand Essence

Short Version

BPO discovery made human.

Longer Version

BPO Profile brings BPO companies and the professionals behind them into one trusted discovery network—making it easier for businesses to find the right outsourcing partner, understand their capabilities, and start meaningful conversations.

---

38. Brand North Star

Everything BPO Profile builds should ultimately support this journey:

DISCOVER

Find relevant BPO companies and professionals.

↓

UNDERSTAND

Explore capabilities, services, industries, locations, and expertise.

↓

CONNECT

Reach the right sales professional.

↓

OPPORTUNITY

Turn discovery into meaningful business conversations.

Final Brand Statement

BPO Profile is where BPO companies get discovered, sales professionals get connected, and business opportunities begin.
